English - Pre-intermediate   Ukrainian - Native   Russian - Native

PROJECT EXPERIENCE

ConCord
https://con-cord-app-8esa.vercel.app/
Tech stack: React, TypeScript, Redux Toolkit, Redux Persist, Vite
Project description: A contact management application built with React and TypeScript. Provides user registration and login, contact list with add/edit/delete functionality, filtering by name and phone number, and session persistence via reduxpersist. Includes a confirmation modal for deletions and responsive design.
Role: Frontend developer (individual project). Implemented UI components, state management, authentication flow, API integration, and session persistence.

Tasteorama
https://d-cgroup-project-f1-x2.vercel.app/
Tech stack: React, JavaScript, CSS Modules, Node.js, MongoDB, Vite
Project description: A group project: a modern recipe-sharing platform where users can search dishes by name, category, or ingredients, view detailed recipe descriptions, save and manage their favorites, and share their own creations.
Role: Frontend & Backend developer. Implemented client-side routing, header, and mobile modal menu on the frontend. On the backend, developed the API endpoint for removing recipes from the user's favorites list.

Portfolio
https://ritas2000.github.io/js-project-dcgroup/
Tech stack: HTML5, CSS3, JavaScript, Vite
Project description: A collaborative project: a portfolio website for a developer with dynamic functionality powered by JavaScript. Features include a project order form, comment form, API-integrated testimonials, interactive swiper, and FAQ accordion.
Role: Frontend developer (team project). Took ownership of the FAQ section development, ensuring smooth UX, responsiveness, and consistency with the overall design.
